

# ▲ RANDOM — CHAIR

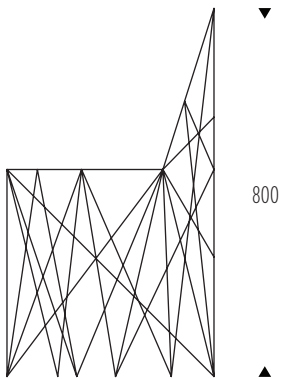

## ▲ SEATING DESIGN

The Random chair, is an entirely hand crafted chair that explores the structural nature and form of a chair and what a chair can look like. Traditionally a chair is formed with strict measurements, templates and jigs.

We wanted to explore a free form chair that is made without any jigs templates or measurement's but entirely by hand eye coordination. The random chair is designed and hand made by LifeSpaceJourney, and available in Dulux powder coat finish.
