

▲ SPUN — STOOL

▲ SEATING DESIGN

The Spun milking stool at 430mm height is the smallest member of the spun series. It is a robust minimal piece with the soft lines and simplicity of a child's drawing. Each piece is carefully hand made by LifeSpaceJourney.

The seat is made from spun steel and each leg hand turned from a unique piece of reclaimed Australian hardwood proudly revealing the markings of a previous life. The spun milking stool is available in Dulux powder coat finish.
